- Web Developer Certification
Ecole O'Clock | 2019-2020
- Opquast — Web Quality Best Practices
Training | 2019
- Mathematics & CS
Paris Descartes | 2008-2011

SUMMARY

Frontend engineering leader with 6+ years building regulated digital products in insurance and savings. Owner of architecture, standards, hiring, mentoring, and technical strategy across web and mobile platforms. Focused on reliability, compliance, and shipping high-quality user experiences at scale.

LEADERSHIP & IMPACT

- Led and mentored a team of 4 frontend engineers through structured code reviews, pairing, and standards
- Defined frontend architecture and technical standards adopted across multiple products
- Improved delivery velocity by introducing a monorepo strategy and shared packages across applications
- Built compliant UX flows for regulated financial processes and sensitive data handling (GDPR)
- Owned production reliability, release management, and incident response for frontend systems

EXPERIENCE

German

2021 - Present

Frontend Lead

- Migrated a monolithic CRA + Redux codebase to a Turborepo monorepo with shared packages, improving build and release workflows
- Shipped a shared design system (Tailwind + shadcn/ui) with accessibility standards to increase UI consistency across products
- Delivered a React Native mobile app and compliant onboarding flows for insurance subscription journeys
- Modernized the stack to Next.js App Router, Server Actions, and tRPC to improve DX and long-term maintainability
- Built advisor back-office tools supporting daily operations across multiple insurance products, including partner API integrations
- Partnered with Product and Compliance to translate regulatory constraints into intuitive user experiences

Skills: TypeScript, React, Next.js, React Native, Turborepo, Tailwind, shadcn/ui, tRPC, PostgreSQL, AWS

Studio Ambient

2022 - 2023

Full Stack Developer

- Shipped end-to-end React/Node platform with back-office CMS enabling non-technical staff to manage content
- Designed PostgreSQL schema and REST APIs, delivering features from database to production UI

Skills: TypeScript, React, Node.js, PostgreSQL, REST APIs, UI delivery

Collect For Good

2022

Full Stack Developer (Volunteer)

- Built a humanitarian logistics platform coordinating donation collection and transport
- Developed Next.js frontend with PostgreSQL backend under tight deadlines

Skills: Next.js, TypeScript, PostgreSQL, product delivery, rapid iteration

Tanke

2020 - 2021

Full Stack Developer

- Developed React applications and Node APIs powering influencer marketing campaigns for major brands
- Owned full stack delivery in fast-paced agency environment, from database design to production deployment

Skills: React, TypeScript, Node.js, PostgreSQL, REST APIs, agency delivery
